

Estimates A – July 1, 2008

Murray water to Adelaide

Mr PEDERICK: I refer to Budget Paper 3, page 6.6. How much water was pumped from the River Murray to supplement the Adelaide water supply for the full 2007-08 water year?

The Hon. K.A. MAYWALD: Just shy of the 90 gigalitres allocated to us for that purpose from the Senior Officials Group and the first ministers agreement.
